QUALITY

1. We through out the ISO9001:2015 quality certification, It is worth mentioning that it was audit and issued by the most stringent SGS in the industry.
 2. All materials are produced from a class 100,000 cleanroom.
 3. Factory direct, we have our own R&D Center and Quality Control.
 4. We also cooperate with domestic famous university for materials testing.
- Experienced technician with equipped R&D center to fulfill new research and development.
 - ONE & ODM services are available.
 - Our products can be 100% compatible with original Agilent, Waters, Virian, Shimadzu, etc.
 - We are looking for suitable partners as our distributors at different markets.
 - Waiting for your information with interest.

QUALITY MANAGEMENT SYSTEM

AIJIREN®

- **Protect sample integrity by choosing the right septa for your application**

Proper septa selection is critical to preventing contamination and avoiding damage to the needle and instrument.

- **Are the septa chemically compatible with your samples and solvents?**

The chart below summarizes chemical compatibility and incompatibility. Aijiren provides this septa compatibility as a guide and a starting reference point. We realize that chemical compatibility can vary depending on the concentration of the solvent, the temperature, the molecular weight of the solvent, and other factors. Therefore it is always recommended you try a variety of septa to determine the best one for your analysis.
